Black Butterfly

Laura Veirs

Goodbye, black butterfly You can take those perfect wings into outer space 'Cause there's no place left in this blood For your restless fluttering, your sleepless ways Black butterfly, flutter me by Kick a little bitter into the night Spark of the stars leaving on my heart Trying to be good by you, alright, alright Salt breeze, rose city sunset The bats are swinging 'round me like drunken ships Ever, evergreen bows above me tower Singing quiet stories 'bout forgiveness Black butterfly, flutter me by Kick a little bitter into the night Spark of the stars leaving on my heart Trying to be good by you, alright, alright Alright, alright Alright, alright Alright, alright Alright, alright Alright, alright
