

You Wanted Everything

Leatherface

When you walk into a room the hours were haunting you
It's all the same to me when you can do nothing
And it always seems that I can do no better
And it always is that it's always
And your feelings as if it's your world
You wanted everything you ever saw
There's more and your doing no right
That I can see that I can see that I can see
You wanted everything you ever saw
Then you went and find the door to some delight for pain
But I can say for sure that I can do nothing
It always seems there's other ways and your feelings
As if it's your world you wanted everything you ever saw
It is more cause your doing alright
That I can see that I can see that I can see
You wanted everything you ever saw
To the way you went away you found another place
A place where you can dance listen it's off *my friend*
There's nothing I can do then you found another place
The place where you can dance listen it's *all of my friends*
You'd let em do that and your feelings as if it's your world
You wanted everything you ever saw it is more then your doing a
lright
That I can see that I can see that I can see
You wanted everything you ever saw then more and your doing alr
ight
That I can see that I can see that I can see
You wanted everything you ever saw
