

Tonight's The Night

Leatherwolf

So you say you're a mighty fellow
With a kingdom to defend
For you will say that you are not worthy
I have envisioned burns in the end
You left me alone with only a staff and my pride

Tonight is the night
I can see only light
Tonight is the night

For the people of the land
That will kill by your command
The evil king and all his soldiers
Shall perish by my holy staff

Certain final scene with the hands
And my own trap

Tonight is the night
I can see only light
Tonight is the night
How many years 'til they realise?

Cried to the point over my own sight
I came down and what do I see?
False idol of gold and corruption
See the fire and brimstone it brings

So many of you heard
Bring you into the light

Tonight is the night
I can see only light
Tonight is the night
How many years 'til they realise?
