

What happened, you used to do anything for love, oh yeah
We drifted, after that we are not the same, no
I made everything about us
You say "stay" then you wanna be free
We go back and forth, but you're still in love with me

So if you're gonna stay, I need you to be here
To show me that you care
Let me know you're here
Give me all of the reasons why I need you, need you here
Let me know you're here

There you go, you keep running and running
Thinking I'm gon' wait around, I'm tired of you letting me down
You know you can't live without us
You know you belong to me
Let's make everything about us
We're gonna stay because we believe
We belong together, just you and me

So if you're gonna stay, I need you to be here
To show me that you care
Let me know you're here
Give me all of the reasons why I need you, need you here

Stay, I need you to be here, to show me that you care
Let me know you're here
Give me all of the reasons why I need you, need you here
Let me know you're here

Let's make everything about us
We're gonna stay because we believe
We belong together, just you and me
If you're gonna stay
...
