

# Our Love

Leela James

Never thought that it would come, a time when I would sing  
I found someone that makes me feel the way  
The moment then I saw you, I ain't been the same  
And every time you touch me I just fall like rain

And you are my own  
And I am your world  
Nothing could ever come between...

Our love (Our love)  
Tonight (There's nothing our love)  
There's nothing like our love  
(I can never get enough) No, no  
(We've got a special love) Our love  
(Our love) Yeah, yeah  
(There's nothing like our love)  
I can never get enough (Your love)  
Your special love

You and me, me and you  
There's nothing that together we can't make it through, yeah  
Feels so good, this love we share  
We're solid as a rock and nothing can compare (solid as a rock yeah) Yeah

You give me your heart  
And I'll give you the word  
Nothing could ever come between...

Our love (Our love)  
Tonight (There's nothing our love)  
There's nothing like our love  
(I can never get enough) No, no  
(We've got a special love) We've got a special love  
(Our love) Love, love  
(There's nothing like our love)  
I can never get enough of your love  
Your special love

(We've got something special) Something special  
(We've got something good) Something good  
(Everything feels so right) Baby just like it should  
(And everything I know) I know  
(We ain't letting go) wWe ain't letting go  
Because we've got our love, love

So special (Our love)  
(There's nothing our love)  
I can never get enough (Of your love) Of your love  
(We've got a special love) Your love, love

(So special, so special) Our love  
(So special, so special) Our love  
(So special, so special) We've got something special, yeah

Our love (Love, love, love, love, love, love, love)  
There's nothing like our love  
(I can never get enough) No, no

(We've got a special love) So special  
(Our love)  
(There's nothing like our love)  
I can never get enough of your love  
Your special love

Your love  
There's nothing like our love, no, no  
There's nothing like our love  
Love, love, love, love, love, love, love  
There's nothing like our love
