

Clarity Denied

Leng Tch'e

Silenced and beaten down
By a 'normalized' environment
A man torn from reality, caged and caved in
Time to put the needle to the test
All which you held high in regard
All which you have learned in your life
All which defines your point of view
All is right, no more needs to worry
No more need to think
The injections make it easier
For them to do the thinking for you
Strapped to a gurney
They took your life from you
Time to put your free will to the test
Reprogramming till you match the mold
A stone cold reality for a fucked up world
Clarity is denied and sealed with a hit...
I've had enough - take another Prozac
I've made my choice - no need to think
I've had enough - take another Prozac
Another fix derrides the will to oppose
Silenced and beaten down
By a 'normalized' environment
A man torn from reality, caged and caved in
Time to put the needle to the test
