Northern Star

Leona Naess

Northern Star Come down from where you are You've hung yourself so strangely My Northern Star

Your three kings are we Waiting to be free We will wait for you Until we are through, baby

Oh, Northern Star, you shine Oh, Northern Star, come down From where you are and save Me

These walls are growing higher Growing higher These walls are growing higher Growing higher

My sympathy Lies with those who try To cage you in And love you more and more

Know your history Maybe then they'd see Though the coldness comes Your beating drums could lead a symphony

Oh, Northern Star, you shine Oh, Northern Star, come down From where you are and save Me

I look at you Like a child Oh no, I'll never be like you I'll never be like you
