

Honest Face

Liam Finn

Don't want to make you feel like you made a mistake
It's why I have to make you get away

There's a look in your eye and I don't feel safe
You're a cheat and a like with an honest face

The world outside is like a severed head
The traffic light won't change its ways
So we run and we hide but you don't feel safe
Cause you stole and you lie with an honest face

I don't say these things just to anybody
I don't say these things just to anybody
I don't say these things just to anybody
I don't say these things just to anybody

There's a look in your eye
And I don't feel safe
You're a cheat and a lie with an honest face

So we run and we hide but you don't feel safe
Cause you stole and you lie with an honest face

I don't say these things just to anybody
I don't say these things just to anybody
I don't say these things just to anybody
I don't say these things just to anybody
