

# Whispers

## Life of Agony

You probably heard all about it  
You probably heard every word  
It didn't take long for them to spread it  
It didn't take long to spread the word

You can whisper if you want to  
You can call me shat you will  
You can cower in your corner  
Or you can say it to my grill

Smiles come from the fake ones  
They'll pretend to be your friend  
They'll cut you down just to have fun  
Then kiss your ass to make amends

And I wish I may and I wish I might...

You never know who really starts it  
You never know who's talking shit  
In the end it doesn't matter  
Cause in the end, they're all on your list

And I wish I may and I wish I might...
