Something deep inside
A spark to reignite the unforgettable fire
Bring it back to life
Don't let it fade away
There's no time to decide when the time is now

With the lightning in a bottle We will see again Catch the lightning in a bottle We'll shine until the end

Emotions amplified
Turn it up to ten
And let the flames grow higher
Bring it back to life
Don't let it fade away
There's no time to decide when the time is now

With the lightning in a bottle We will see again Catch the lightning in a bottle We'll shine until the end

Planets and the stars align What it means to be alive If all the others don't survive Will we?

With the lightning in a bottle We will see again Catch the lightning in a bottle We'll shine until the end
