Im a' blast on a hater
And worry bout it later
Got heatas in my hand
Masked up like Darth Vader
I dont wanna rap
I let my guns do the talkin
I dont wanna rap
I let my guns do the talkin

Now I dont tote around Or even talk to you chumps I eat, sleep, get high And even walk with this pump You cross me wrong one time One times to many I got about a thousand rounds And ill pop off plenty And I know youngstas in the hood That will pop for penny's So fo a hundred bones youll wash up On that banks of the sippi. And they virginity they ain't been takin But they take what shorty like Now he on his way upstate They gave a shorty life Thats what I mean when I say We'll worry bout it later He didnt think he just went out And blasted at him a hata. Lifes too short to not be out here Chasin that papa. thats why I'm out here Masked up in all black like Darth Vader

Now if you see me in the streets
Dont think I wont do sometin crazy
Walk up with this 380 put it right to ya baby
I got kids and I know that could be the worse thing I could do
If anyone takes some beef that far there really meanin business foo
So just cooperate and dont make a sudden move
One wrong word could leave some bullets up in you
Im so gangsta bitch dont even get me twisted
You got pastel pills and your brain could get evicted
And we dont fuck around in the gritty grimy great city of Memphis
We known for three thangs barbecues, good music and pimpin
If you make your way down here
Make sure your strapped when you out walkin cuz
We dont rap around out here
We let our pistols do the talkin
