

Through the Night

Lilly Wood & The Prick

Say you're right like you were dark
You'll be just fine
If you need a hand to hold
You've got mine
Stand up straight, don't make a sound
You'll do just fine
If you need a hand to hold
You've got mine

It's been a long time
I need a body on top of mine
Making love the whole night
Making love the whole night

Don't you understand
I never want this to end
If you need a body to hold
You've got mine
Why is the night bound to end
The sun is not my friend
If you need a body to hold
You've got mine

It's been a long time
I need a body on top of mine
Making love the whole night
Making love the whole night
It's gotta feel right
Dead outta skin against mine
Figuring out what you like
Try to make this body feel right

It's funny how I miss you sometimes
It's weird but I think it's your smell
I'm looking for in everybody else
And I'm a much better version of myself
But that alone is not enough
I need the warmth, I need the love

It's been a long time
I need a body on top of mine
Making love the whole night
Making love the whole night
It's gotta feel right
Dead outta skin against mine
Figuring out what you like
Try to make this body feel right
