

Forever and a Night

Little Big Town

Look at me lower your guard
I know it's hard to believe
But I'd never do you harm
Lie down with me
Here in the dark
Listen to our hearts beat
Bring it back to the start

And I want you to hold me
And take me into your arms
Safe from the storm
And baby let me love you and kiss you
And I'll make it alright
It might take some time
Give me forever and a night

You've got me under your spell
I can hardly speak
Burning like hell
Say that you need me
Like the night that we fell
In love so deeply
So completely

And I want you to hold me
And take me into your arms
Safe from the storm
And baby let me love you and kiss you
And I'll make it alright
It might take some time
Give me forever and a night

And I want you to hold me
And take me into your arms
Safe from the storm
And baby let me love you and kiss you
And I'll make it alright
It might take some time

And I want you to hold me
And take me into your arms
Safe from the storm
And baby let me love you and kiss you
And I'll make it alright
It might take some time
Give me forever and a night
