

Tumble and Fall

Little Big Town

It's a want you, it's a need you
It's a hold on through the pain
It's a get through what you got to
'Cause it can't stay the same
It's a long talk with the lights off
It's the last breath in your lungs
It's the deep end that we jump in
It's the love that we become

We're gonna ride the storm on a lifeboat
Baby this kind of love is all that we know
We're gonna talk a walk out on the trapeze
Even in a wild breeze, we can be the best of 'em all
Even if we tumble and fall

It's a reach out, it's a white flag
It's a forfeit of the game
It's a let go of the ego and the whisper of a name
It's a fight for, not a defend
It's a stayin' in the ring
It's a knowin' that you love me more than anything

We're gonna ride the storm on a lifeboat
Baby this kind of love is all that we know
We're gonna talk a walk out on the trapeze
Even in a wild breeze, we can be the best of 'em all
Even if we tumble and fall

It's a want you, it's a need you
It's a hold on through the pain
It's a get through what you got to
Yeah, you got you, yeah we got to

We're gonna ride the storm on a lifeboat
Baby this kind of love is all that we know
We're gonna talk a walk out on the trapeze
Even in a wild breeze, we can be the best of 'em all
Even if we tumble and fall

Even if we tumble and fall
