

Big Bang Theory

Little Feat

Sit down fool let's have a conversation
I got a few opinions 'bout our co-habitation
What's a matter baby did I do something wrong?
I took out the garbage and I mowed the lawn

This ain't about what you do or don't do
Although I'd like to get into that too
Now, you always complainin' about what I forgot
Now, you runnin' cold when I'm runnin' hot

Doors are slammin' windows rattle
Raise a flag put an end to this battle
It's all of this talk that is makin' us weary
Loves harder to figure than the big bang theory

Looky here baby you could do a lot worse
Well you ain't the center of the universe
Hey, I'm light years better than what you've ever had
Anthropic principles oh so sad

Say what?
Listen up
When I want to get lucky all we do is fight
Wore yourself out on the remote last night

Doors are slammin' windows rattle
Raise a flag put an end to this battle
It's all of this talk that is makin' us weary
Loves harder to figure than the big bang theory

Now you got me thinkin' 'bout the way things are
Look here bullet-boy, you ain't always right
You can't even find your way home at nights
What's up with that?

I'd like to address the way you bring home the car
You're out-o-gas, full-o-trash
You talkin' trash while you spendin' my cash
What happened to the fender, I'm afraid to ask

You so cute when you're mad
You're a fright when we fight
Must be a better way to spend the night
Opposite attraction began this reaction

100% pure satisfaction
Hey super nova better move on over
'Bout me and you, woman and man
Been this way since time began

Doors are slammin' windows rattle
Raise a flag put an end to this battles
It's all of this talk that is makin' us wary
Loves harder to figure than the big bang theory
