## **Everything (Between Us)**

Liz Phair

We have everything we need here We have everything between us You have nothing left to fear dear Cause it ain't ever gonna leave us

We might get a room downtown now Get away for a half day We might drave a car to the next town Get away from our family

Let your body move real slow
Tell your body we left yesterday
Let your body hold me close
Let your body move you
We have everything we need here
We have everything between us

You have nothing left to fear dear Cause it ain't ever gonna leave us

Let your body move real slow
Tell your body we left yesterday
Let your body hold me close
Let your body move you

Let your body move real slow
Tell your body we left yesterday
Let your body hold me close
Let your body move you

Let your body move real slow
Tell your body we left yesterday
Let your body hold me close
Let your body move you

We have everything we need here We have everything between us
