

## Electric Waves

Locnville

Chorus: Take me on one of those, no need to show me where it goes, electric waves can take me places that I've never been before, and I know, I know, I'm going to ride this one out til I go, I go, feel electricity flow.

Dive into the voltage ocean, no cold, no false devotion, I'm feeling it surge, stepping on words, keeping my focus open, and keeping the hoppers hoping, to show them one day I will overthrow them, and know that the motions coping with those who swallow the potent potion, the roller coaster's coasting, marvel at the poster moment, a toast to those who shows to go and show the most involvement, who own the throne and hold it, carve their name to boast exposure, I'd bet you know them don't you, most get sold and thrown to vultures, no watch it go up and see it come down.

Chorus: Take me on one of those, no need to show me where it goes, electric waves can take me places that I've never been before, and I know, I know, I'm going to ride this one out til I go, I go, feel electricity flow.

Free falling, dipping in waves, spinning in haze, just come with me darling, infinite ways in which to ease problems, and I believe it's up to me, to keep a peak on scenes that others haven't come to see, and teach beliefs on how easy it is if people be, the key to see the other side if evils need to preach, a dream that seems to keep the peace, a feeling that I need to reach, I'm pleased to see the features meet, a sweep of electricity, and then I, I watched go up and then I saw it come down.

Chorus: Take me on one of those, no need to show me where it goes,  
electric waves can take me places  
that I've never been before, and I know, I know, I'm going to ride  
this one out til I go, I go, feel  
electricity flow.
