

Golden Trinkets

Locnville

She want that
Golden trinkets, diamonds all the shiny things
And rings with promises of timeless things
But it's nothing like the time I spent with you
She want that
Golden trinkets, diamonds all the shiny things
And rings with promises of timeless things
But it's nothing like the time I spent with you
Say "Hi"
Came up from a great day
Lets go have a great night
Get a little loose
Mainstay, came out on a late night
Man, I had a great time getting down with you
Came right, resting in the next day
Texting through the next night, this is what we do
Guess I'll always have the best time
Thinking about the next time spending time with you
She want that
Golden trinkets, diamonds all the shiny things
And rings with promises of timeless things
But it's nothing like the time I spent with you
She want that
Golden trinkets, diamonds all the shiny things
And rings with promises of timeless things
But it's nothing like the time I spent with you
We both knew it now we both know
She wanted a photo with me on her phone
She was with her friends so I asked her what she came for
Said meet at the hotel on the fourth floor
We both had a great time
Now she on her way home
I still got like 8 shows
I'll leave in the morn
Hope I got a late flight
'Cus man it was a late night
I think I'll use this day time to take a little more
She want that
Golden trinkets, diamonds all the shiny things
And rings with promises of timeless things
But it's nothing like the time I spent with you
Straight gold might be what she came for
Only thing she stays for, is all of my love
Straight gold might be what she came for
Only thing she stays for, is all of my love
She want that
Golden trinkets, diamonds all the shiny things
And rings with promises of timeless things
But it's nothing like the time I spent with you
She want that
Golden trinkets, diamonds all the shiny things
And rings with promises of timeless things
But it's nothing like the time I spent with you
Straight gold might be what she came for
Only thing she stays for, is all of my love
