

Light in the Night

Locnville

Ref. (2x)

One night I saw light that changed my life
The other side
I might describe the light as flashing
Whooooah

The winds swirl colours, blowing at my feet
I hope that I can stop before I get too deep
And how would I pull myself up?
I'm surrounded by miserable souls
Who've had enough here
This is musical pain, Les Miserables
I'm tired of keeping it inside, let's get it out there
Now this is anguish following light
Solid facades, but they're hollow inside

Ref. One night I saw...

Hurricane blowing, nothing that I can't face
How can you keep going when you don't have faith?
Study the stars and some
Utter the words that come
Right now it's all or none
So passive arrogance gets you nowhere fast
And then the only way you move is back
That's when I call on the light
I stand with pride, this is obviously mine

Ref. One night I saw...

So many lights in that one time
Colours around me (round me, round me)
Colours all around me (round me, round me)
Colours all around me (round me, round me)
I accept it when it shines on me
So excited I can feel my heart beat (beat, beat, beat)

Ref. One night I saw...
