

# Dragonriders

Lonewolf

Winter comes from the sea  
Cold winds bring pain and fury  
Frost will bite all of you  
Like a wolf, without mercy

We arrive, we arrive  
We see your shores  
We arrive, we arrive  
The wolf is at your door

We have followed the northwind  
And we're so far from home  
Give a name to your wildest fears  
Our time has come

We are the dragonriders  
The hordes of Thor, the demons of the sea  
We are the dragonriders  
We hail, we kill, we fight for victory

Say you prayers, we are near  
Taste the smell of your fear  
We'll nail your god to his cross  
With the hammer - the hammer of Thor
