

Hellride

Lonewolf

Lights are out, candles burn
Phantoms dance around us
The trails into fire we follow
Angel in laces, beauty of the dark
Her eyes begging to be fed
The she-wolf's unleashed, now she's gonna eat me alive

Take me for a hellride
Let's go to hell and never come back
Take me for a hellride
Cause I love when the fires burn

Pleasures of sin and the flesh
Valkyrie to damn every saint
She's turning me on, I loose control
Night is ours, beyond the stars
Leaving time far behind
Until it stands still, until we return from the flames
