

# The Poison Of Mankind

Lonewolf

Like a expanding spider web raising a black shadow onto our world  
Injecting poison into man's heart  
Growing its fears and tearing its soul apart  
Born in darkness and evil, hellfire's feast awaits the fallen ones  
Fight the demon back to its lair  
To get rid of the poison and welcome freedom

Religion means war and pain  
Our world goes insane  
They want to see their flag up high  
They want freedom to die

Back into darkest days, where evil prevails  
They're in for the kill

The poison eating the heart of men  
The virus that kills their souls  
The decease inside the brain of men  
The tool making them go insane

The poison - the plague that blackens mankind  
The poison - the poison of mankind

And if the day should come  
To heed the call to arms  
I will defend my country  
My freedom and family
