It's Easy When You Smile

Lori McKenna

It's easy when you smile We can talk a while Just lie here in my arms Safe and warm

Outside the night is so unclear Stay here And everything will disappear

It's easy when you laugh Troubles cut in half Where I will go without you? I don't know

Outside the night is breezing by Don't cry And everything will be alright

Hold me, hold me, stay Tomorrow's far a way And so are we And that's why it's easy

It's easy when you say We can find a way Don't worry about it now We'll get through it some how

Outside the night is almost gone Stay strong And maybe we can still go on

Hold me, hold me, stay Tomorrow's far away And so are we

It's easy when you smile We can talk a while Just lie here in my arms

Safe and warm Oh... oh easy It's so easy when you smile
