

This Song Will Last Forever

Lou Rawls

This song will last forever
After we're dead and gone
You know the melody will linger on and on and on
Talking about this song
Is gonna last for ever

Generations come
Generations go
But they dance to the same music
And fall in love as they go
Songs like tangerine
I'm in the mood for love
I wonder how many people have danced across the floor
I wonder how many violins have played
The melody to my way
While lover sits
Lover sit back and alight
And how many songs about June
While people swoon by the light of the silvery moon

I said this song is gonna last for ever
After we're dead and gone
Let me tell you that the melody will longer on and on and on

I'm talking about this song
It's gonna last for ever
You know there's a song for every thought
And every special occasion
There's a song for resistance and
There's a song for persuasion
There's a song for pain and pleasure
Stormy and sunshiny weather

This song gonna last for ever after we're dead and gone
You know the melody will linger on and on and on
I'm talking about this song, is gonna last for ever
This song, is gonna last for ever
After we're dead and gone
You know the melody, the melody will linger on and on and on
I'm talking about this song, is gonna last for ever

Well, well, well...
This song is gonna last a long long time
Gonna be around forever
Songs like "When I fall in love"
Songs like
Songs like
Songs like "I love music"
Songs like "Tobacco road"
Songs like "Natural men"
Songs like "Dead end street"
Songs like
Songs that make you wanna dance all night long
Talking about this song
Talking about this song
This song...
