

## Change In The Weather

Love Spit Love

Watch out sweet thing  
A change in the weather is all that you bring  
Look up the weather's strange  
The only thing we know that's gonna come for sure is change

Look at my life, go round and round  
Hands on the clock still turning  
Now I want it but I just can't see  
I want that and that's just like me

Goodbye, bye kids  
Where you gonna run from the things you keep hid  
Look out the weather's strange  
The only thing we know that's gonna stay the same is change

Look at my life, go round and round  
Hands on the clock still turning  
Now I want it but I just can't see  
I want that and that's just like me

You know it's me  
That picks you up  
You know it's me  
That puts you down

Watch out sweet thing  
A change in the weather is all that you bring  
Look up the weather's strange  
The only thing we know that's gonna stay the same is change

Look at my life go round and round  
Hands on the clock still turning  
Now I want it but I just can't see  
I want that and that's just like me

You know it's me  
That picks you up  
You know it's me  
That puts you down
