

Codeine

Love Spit Love

There's too much murder
Ghost in my mouth
And it's talking too much
And I can't keep my head straight

There's crowds on the sidewalk
It's making my head hurt
And where did the sun go?
And don't ask me

I don't know
Don't get closer
Don't move
Don't ask why?

I get two steps closer
Don't move
Don't ask why?
I go through changes

All my friends are strangers
I see them get small
And their name on their ties
And there's so much is ugly

It's so far that I see
I can't see myself without
Closing my eyes
I get two steps closer

Don't move
Don't ask why?
I get two steps closer
Don't move

Don't ask why
You said you've got
More than I want
And time in itself is blind

And you said you've got
More than I want
And time in itself is blind
And I know why they lie

Time in itself is blind
Time in itself is
You said you've got
More than I want

And time in itself is blind
And you said you've got
More than I want
And time in itself is blind

And I know why they lie
Time in itself is blind

Time in itself is blind
Time in itself is blind

Time in itself is
The whole world is broken
I'm born in a hole
And the summer is gone

When it all falls to pieces
I'm going back home
With my head on the ground
He said where did the sun go?

And I said I don't know
But don't get closer
Don't move
Don't ask why?

I get two steps closer
Don't move
Don't ask why?
