

Lucky Star

Lovebugs

La tristesse caught me long ago
Medication fooled me, chemicals reduced my filter
Happiness soon left me when you where gone
So where's my lucky star tonight

La tristesse taught me long ago
Your dedication fooled me, complacency reduced my filter
Happiness soon left me now I'm alone
So where's my lucky star tonight

"you're such a lucky one" you said
"must have a lucky star out there"
"you're such a lucky one" you said
"but now it is all gone"
Where has it all gone?
Where has it all gone?

Somehow started drinking to get a bit closer to you
Then started smoking to get a bit closer to the end
Closer to the end
