

Lying hard awake, smitten by the sun
Monotony goes on and on and on
You were made for more, itching and undone
Your wanting this goes on and on and on
Let me ride your star?

Cult kid! Get in line!
You could follow me sometime
Once more sticky floor
Velcro heart I want you more
Soul ease, let it breathe
I got the cure if you got the need
Cult kid! Give me a kiss
No one here will love you more
No one here will love you more

Black out holidays taking all the weight
Autonomy goes on and on and on
You were made for more, life is such a bore
You never let us down
Let me ride your star?

Cult kid! Get in line!
You could follow me sometime
Once more sticky floor
Velcro heart I want you more
Soul ease, let it breathe
I got the cure if you got the need
Cult kid! Give me a kiss
No one here will love you more

Will you love me more?
Let me touch your face?
You are all I adore
Give me your ways
You are all I want
Let me catch your wave
Are you getting bored?
I will kill your face!

Cult kid! Get in line!
You could follow me sometime
Once more sticky floor
Velcro heart I want you more
Soul ease, let it breathe
I got the cure if you got the need
Cult kid! Give me a kiss
No one here will love you more
