

She's Disaster

Lovedrug

I wake up the same story
I hear you at the door
I see my medication
Will cut you on the floor
A fever you're shaking
And boozing on the shores
A nightmare like a devil
But still I love you more
She's disaster, she's disaster
She's a caution a warning sign
She's disaster
I'm begging four thirty
Please put your clothes back on
There's doctors in the dining room
Who came to fix what's wrong
Your cracking, I'm sorry
There's nothing can be done
Your dancing round on life support
With matches and a gun
She's disaster, she's disaster
She's a caution a warning sign
She's disaster
No more speaking you need cooling
Let me hold you now
You're a nuclear, Followed beauty
No one can hold you down
She's disaster, she's disaster
She's a caution a warning sign
She's disaster
She's disaster, she's disaster
She's a caution a warning sign
She's disaster
