

# One World

Lowkey

[Intro: tony benn]

The way we are controlled, is very simple, they keep us frightened.  
Used to be the Kaiser, then hitler, stalin, now the muslims, next it will be  
the chinese.

They keep us divided men and women, black and white, muslim, christian and j  
ew. they keep us demoralized, that's what the education system league table'  
s about, and they encourage cynicism. And in that way they hope to control u  
s.

And I think if you are going to establish you're rights, you have to begin b  
y being absolutely clear, you are not frightened, not divided, not demoraliz  
ed, not cynical and then you can make progress.

[Verse 1: Lowkey]

What I call positive, you call negative  
What you call an optimist, I call a pessimist  
In these times; apocalyptic: what is a misfit?  
We all bleed red blood when the oxygen hits it  
Let me talk on this, you should be more honest  
The truth is the war in iraq was a resource conflict  
Take a look at your flag, they'll destroy it in a flash  
Drop bombs on your soil for the oil and the gas  
Capitalism means weak devoured by the hungry  
That's what happens when companies are more powerful than countries  
Watch x-factor, go on twitter and keep talking  
Listen my friends it's til the the end; we are sleep walking.

When the selfish gain wealth from blood,  
It's like the whole world submitted to be-elzebub  
We won't, help ourselves and no ones helping us  
It's only a matter of time before we self destruct

[Chorus:]

(We've only got one world)  
We've only got one world  
We've only got one  
We've only got one

[Verse 2: Lowkey]

Take these words as a warning  
If you wanna wake up, to hear the birds chirp in the morning  
T. N.C.'s commit crimes unforgivable  
In 50 years time, will our world be liveable?  
Most natural disasters aren't natural at all  
Every slave has a master, there's an actual cause  
The ice caps are melting so fast, and they're coming for ya  
How long before bangladesh is under water  
Talk of white farmers, and what mugabe did to them  
But what about the plight of the somali fishermen  
How they dumped waste in their water and took their livelihoods  
Turn off the tv, read a flippin library book

When the selfish gain wealth from blood,  
It's like the whole world submitted to be-elzebub  
We won't, help ourselves and no ones helping us  
It's only a matter of time before we self destruct

[Chorus x2]

[Verse 3: Lowkey]

Who can live off the land when what you stolen is gone bro?  
As precious as the gold in the coves in the congo  
What is wrong when the human race makes atomic bombs?  
Sometimes I look to the sky and wonder where god is gone  
Is he just waiting for a man made judgement day?  
Don't worry mate, just watch tv and stuff your face  
There must be another way, I'm unafraid to speak up  
What you think caused the tsunamis? and hurricane katrina?  
In the grand scheme of things what good is a verse?  
We weren't meant to abuse what god put in the earth  
Now you wonder why I'm not a fun guy  
When it hits our kids the only thing that survives will be the fungi

When the selfish gain wealth from blood,  
It's like the whole world submitted to be-elzebub  
We won't, help ourselves and no ones helping us  
It's only a matter of time before we self destruct

[Outro:]

(We've only got one world)  
One world, One race, and One love
