

Up Against Me

LP

I wanted more
It went away
I asked to look
She said maybe
I wanna take
Us all the way
Don't ever change
Okay

Don't believe the government or anything you read
Nothing really matters when you're up against me

Get in and tell us what we're up against
I just want you up against me
Never need to tell us what we're up against
I just want you up against me
I just want you up against me
Up against me

A tiny war
Inside your head
That chips away
And wants you dead
It's all about
What Lennon said
Let's change the world
From bed

And don't believe the government or anything you read
'Cause nothing really matters when you're up against me

Get in and tell us what we're up against
I just want you up against me
Never need to tell us what we're up against
I just want you up against me
I just want you up against me
Up against me

They don't know our kind of love
Just come on over, my love
They don't know our kind of love
Just come on over

Get in and tell us what we're up against
I just want you up against me
Never need to tell us what we're up against
I just want you up against me
Get in and tell us what we're up against
I just want you up against me
Never need to tell us what we're up against
I just want you up against me
I just want you up against me
Up against me
