

You Want It All

LP

We've been on this roundabout
Swimming in these pills till dawn
But there is no time now
The rain is coming down
So prepare for war
You can't run that far
You got to stand your ground
There's no more days to count

I was there for you
I'd have died for you
I changed my life for you
You couldn't keep it true
You'll never know how hard
I hit the ground that day
The changing of the chord
The bitter taste again

Winds are starting to blow out there
Sun will be yours if you run for it
Stop by the sea, with no regret
Gets so hard but you know you want it all

Yes, in your poetry
I knew you'd come for me
And all those subtleties
Of what was meant to be
You could hear the call
When you jumped to fall
Just remember now
It's 'cause you want it all

Winds are starting to blow out there
Sun will be yours if you run for it
Stop by the sea, with no regret
Gets so hard but you know you want it all
You want it all

You want it all [x6]
