Tempest

Lucius

We are two ships passing
How long will this last
We haven't had the time to work it out
Sitting in the backseat
Who knows where our paths meet
And you keep shouting we've gotta work it out

You gotta believe me when I say I know
(Gotta work it out, it out)
You aren't riding on this wave alone
(Gotta work it out, it out)
Gotta believe me when I say I know
(Gotta work it out, it out)
I already know I know I know I know

Yell all that you want to
I'll yell it right back to you
Back and forth until we've tired out
Temper into tempest
Washes off the madness
But we're still left with figuring shit out

You gotta believe me when I say I know
(Gotta work it out, it out)
You aren't riding on this wave alone
(Gotta work it out, it out)
Gotta believe me when I say I know
(Gotta work it out, it out)
I already know I know I know I know

The seeds of what you say all beg for reason
Plant them deep so we can disregard them
Been listening to every word you said
You're just waking up to get back into bed
The seeds of what you say all beg for reason
Plant them deeply so we can release them
Been listening to every word you said
You're just waking up to get back into bed

You know I'm riding on this wave alone
You know I'm riding on this wave alone
You aren't riding on this wave alone
I already know I know I know I know
Gotta believe me when I say I know
Already know I know I know I know
Already know I know I know I know
