

Turn It Around

Lucius

She felt comatose waiting for this thing to grow
She's impatient 'cause she wants it now and so it shows
She can't be bothered by the ties that bind her
She's united when it strangles everything it holds

She's looking through the wrong end
She's looking through the wrong end
She's looking through the wrong end of the telescope
Turn it around, turn it around

She closed the door with the intention of not looking back
But missed her step because she didn't have a steady track
She can't be bothered by the mistakes she's made
But she's forgetting that's what guides you to the rightful path

She's looking through the wrong end
She's looking through the wrong end
She's looking through the wrong end of the telescope
Turn it around, turn it around

As suspected back at home it grew out of control
Well that can happen when you leave things to a little girl
So now she's left without an option at hand
She better tend to it or she won't have another chance

She's looking through the wrong end
She's looking through the wrong end
She's looking through the wrong end of the telescope
Turn it around, turn it around

She's looking through the wrong end
She's looking through the wrong end
She's looking through the wrong end of the telescope
Turn it around, turn it around
