

# My Love Will Never Die

Lucy Woodward

Though time has passed and months has gone  
This love in my heart has lingered on  
But when I gets worried I sneak away and cry  
You know my love  
You know my love  
You know my love will never die

You've done me wrong for a long, long time  
With all you've done I never changed my mind  
But when I gets worried I sneak away and cry  
You know my love  
You know my love  
You know my love will never die

You're gonna try many things to pacify your mind  
You'll even get married tryin' to have a good time  
With everything you'll do you'll never rest  
You're gonna spend your life full of loneliness

And flowers grow upon my chest  
And colored blossoms where I lay and rest  
It was my mind that was bursting  
Bursting out from inside  
You know my love  
You know my love  
You know my love will never die
