

# Change

Luka Bloom

Every time I fall down  
It's a new beginning  
Trying to rise up  
Has more to love than winning  
I love it when the moment of change comes  
I love it when the road is clear  
I love it when the moment of change comes  
The beginning of the end of fear

We all rise up my friend  
Rise up slow  
We all rise up my friend, to grow

From our saying hello  
When the dancing begins  
From the meeting of our eyes  
To the tingling touch of skin  
I love it when the moment of change comes  
I love it when the road is free  
I love it when the moment of change comes  
The open road and me

We all rise up my friend  
Rise up slow  
We all rise up my friend, to grow

From running around the world  
To standing still  
From taking all the earth can give  
To knowing when you've had your fill  
I love it when the moment of change comes  
I love it when the road is free  
I love it when the moment of change comes  
The open road and me

We all rise up my friend  
Rise up slow  
We all rise up my friend, to grow
