

You And I

Lulu

You and I just don't seem to get along
Could be we must have started all out wrong all way back
Year long ago
You and I don't know why we even bother
We seem to bring out the worst things in each other
So much baby, so much

But I know it's not my fault
I know I tried so hard to judge fairly everything that I see
Try to find out if it's you or me
But I want things to work out
I think they would if only
We just give another chance
If so I think it would enhance
We could be together
You and I
Forget it!

You and I too well brought up lucky beings
We'd do well by each other never see you again
You and I have to go our separate ways
I found out being nice just doesn't play anymore
No anymore

But I know it's not my fault
I know I tried so hard to judge fairly everything that I see
Try to find out if it's you or me
But I want things to work out
I think they would if only
We just give another chance
If so I think it would enhance
We could be together
You and I
Forget it!

You and I
You and I
You and I
