

One Heart to Another

Maddie & Tae

You can't keep a secret in a tell-all town this size
I figured I'd see you around
I didn't know what I'd do 'til now
And I don't wanna impose or cause a scene
But I'm gonna tell you what the last one told me

From one heart to another
From one ex to the next lover
I've felt that spell you're under
That kiss underneath those covers
When it's good, it don't get better
He'll make it feel like it's forever
But from one ex to the next lover
He goes from one heart to another

Some take to drinkin' and some take to the words in red
Some lay low, some get high
Everybody's got their way to get by
To fix what's broken inside
And for him, it's goodbyes and taillights

From one heart to another
From one ex to the next lover
I've felt that spell you're under
That kiss underneath those covers
When it's good, it don't get better
He'll make it feel like it's forever
But from one ex to the next lover
He goes from one heart to another

You can't fix it (you can't fix it)
You're gonna see it (you're gonna see it)
He's addicted to the leaving

From one heart to another
From one ex to the next lover
I've felt that spell you're under
That kiss underneath those covers
When it's good, it don't get better
He'll make it feel like it's forever
But from one ex to the next lover
He goes from one heart to another

One heart (one heart)
To another (to another)
