

It All Starts Here

Magic Man

I've got a restless heart burning up inside my bones
Just the kid looking out the window over rusted rundown moon
Wall eyes, and a thicken smile
Radio drowning on and on
Don't hold back, don't hesitate
'Cause we've got fire, it's in our blood

God damn this restless heart, keeping me up through the night
I'm fine down the inner state, in the same old car that I used
to drive
Cold dust in the desert rain, radio drawing on and on
Don't hold back, don't hesitate!
'Cause we've got fire, it's in our blood

And you don't need to be careful
No, you don't need to be careful
No, you don't need to be careful
Ooh oh oh ooh

I've got this restless heart burning up inside my bones
I remember looking out the window
Over rusted rundown moon
Wall eyes, and a thicken smile
Radio drowning on and on
Don't hold back, don't hesitate
'Cause we've got fire, it's in our blood

And you don't need to be careful
No, you don't need to be careful
No, you don't need to be careful
Ooh oh oh ooh

We hold our heads over the rising tide
To find our way out the city lights
The morning skies never seemed so clear
It all starts here
We hold our heads over the rising tide
To find our way out the city lights
The morning skies never seemed so clear
It all starts here

It all starts here
Oh oh ooh
It all starts here
Oh oh ooh
