

Back to Earth

Magnum

I miss those evenings and the company
When lights go down around this place
The nights are long and go on endlessly
And I forget the human race

But there's one thing that brings me back to earth
Please tell her

Tell her I need her, tell her I want her
Tell her I miss her more every day
Tell her I need her, tell her I want her
Tell her I miss her more every day

I take the days and spend them crazily
Could be the last one of my life
And what I thought that would be ecstasy
Holds no surprise but still shines bright

But there's one thing that brings me back to earth
Please tell her

Tell her I need her, tell her I want her
Tell her I miss her more every day
Tell her I need her, tell her I want her
Tell her I miss her more every day

Time comes, time goes
Sunlight, shadows
I need her with me, all too clearly
Everybody knows

Tell her I need her, tell her I want her
Tell her I miss her more and more every day
Tell her I need her, tell her I want her
Tell her I miss her more and more every day
