

# Dragons Are Real

Magnum

I get myself to the top of the stairs  
Into my room, to the land of nowhere  
And read about all the princes and kings  
Soldiers at war doing treacherous things

I've crossed the seas to a different land  
Shot through the skies at the wave of a hand  
And when I've looked up at castles so tall  
Into the clouds, any minute might fall

The dragons are real  
I've seen them fly out of the sun  
And all the fools will disappear  
Watch them all run  
Go take me away, take me away

I've stood alone where the mountains are blue  
Watching the world's unbelievable view  
A special book makes the child in us cry  
Magic in words at the blink of an eye

The dragons are real  
I've seen them fly out of the sun  
And all the fools will disappear  
Watch them all run  
Go take me away, take me away

They dogs they will howl  
The jokers will cry, cities will fall  
Heroes are gone, villains draw near  
I see them all  
Go take me away, take me away
