I never though I'd feel so helpless Something's happening to me 'Cause every night feels like the longest And every hour's eternity

'Cause I can't have you like I wanted to I got nothing without you

So now I dream about you
I got my arms around you
Dream about you
Ain't nothing else I can do
I want to be where you are
No matter near or how far
So now I dream about you

I'd never thought I'd feel defenceless Nothing mattered much to me The sun goes down, I get restless All those same old memories

I know your touch
You're look, you're every word
Can you hear me, baby?
I want you back again into my world

I want to dream about you all my life
No matter near or far
I promise, promise I'll be where you are
I'm going to dream about you
