

Fireworks

Make Them Suffer

So long, goodbye
Because tonight I think I'm ready to go
And so I'm praying you're still laying there and waiting when I
'm finally home
I had to do this for me, because it's all I know

This time I'll make things right
Come bring your flames, take my hand
We'll together watch it burn

We're going to burn it to the ground
And we'll be surfing on the sun
Let's see them try and stop us now
Let's watch them burn

(When we're through)
Trace it back, we'll remember who we used to be
(When we're through)
Don't hold back, don't forget that we meant to be
We'll both together watch it burn

We'll both together watch it burn
So hoist those sails we're headed east
If there's a chance
That when we're through they'll send me home

This time I'll make things right
Come bring your flames, take my hand
We'll together watch it burn

We're going to burn it to the ground
And we'll be surfing on the sun
Let's see them try and stop us now
Let's watch them burn

(When we're through)
All of the radiant flames reflecting off of my face
And streaming down from my cheeks, they'll dance the night away
(When we're through)
We'll watch the fireworks
I had to do this for me, because it's all that I know

If there's even just a chance
That when we're through they'll send me home
