

Dying To Survive

Mallory Knox

Run around, all you do is run around painting
faces in the crowd
The lies you say out loud well all they do is wear
them down
The sun will shine bright enough to make you
blind
When all is said & done, this war is all but won
& now you're running out of time

I wanna rot my body away
There's bruises on our bones from yesterday
I wanna keep my heart here inside
You & I are dying to survive

See all the people they're hunting around for
you
And do you feel it?
The hatred you know it's true
Watch them beat you down as it falls down again
I think of changing & making the world anew
but if you stop it & hold it with all you do
You'll hear our feet stamp down as we march
down tonight

I wanna rot my body away
There's bruises on our bones from yesterday
I'm gonna keep my heart here inside
You & I are dying to survive

March on, lead them away from all the
problems that tie them
Down town will be on fire burning the
foundation down
To build up walls to enslave you
No more houses to hold you from the truth that
you made
London is burning down

March on, lead them away from all the
problems that tie them
Down town will be on fire burning the
foundation down
To build up walls to enslave you
No more houses to hold you from the truth that
you made
London, burning, down
