Another cold night 360 flip swiftly down six hit me, is she busy?  
I'll call her after Pass a Snapple, and a camera angle,  
Ledge vandal can't break my ankles  
I'm on point, but we're running cops are fronting,  
Wanna stop something you loving,  
I'll pray about it  
Ill maneuvers over sewers with back packs,  
And curved hat attachments freestyle my stats no accidents,  
Imagine that no security no Cops!  
Visualize ill's ciphers every corner block.  
I never sold rock or bust glock  
My walk talks it's own, I like to lick tones in your head phones  
So what's the purpose to live life to the fullest  
I serve Christ so I don't watch for bullets, Just live how I wanna respect h  
eaven spit lava,  
Street philosopher raised up in Canada

Exposing Light manafesto down town in the metro  
Fill my car up with petro,  
I best go, I'm already late,  
They call me speedy so I'm easy on the breaks  
What's up yo, cool man chilling,  
I'm dealing with this girl, yo man she's Illing  
I learned to separate the girl from the rhyme,  
And skate sometimes my mind escapes lock it down to meditate  
Concentration it's a full occupation thought invasion,  
It's like my God verses Satan  
Excuse me why I'm doing this  
To influence kid's students of all ages all races  
Give this rap scene a face lift dive inside my minds matrix  
New school Christ Patriot  
What I stand for the one they hold the banner for  
I came with a board sword plus a stack of metaphors.
