

# Put The Light On

Marco Mengoni

We are oh oh  
Standing on the edge

Waiting in the darkness looking for something  
trying to find a way around  
with tired eyes and fear inside  
that you never gonna hear that sound  
that saves us all from falling  
can you hear the calling out  
the calling out

Looking for the bright star looking in wonder  
shining in the sky tonight  
gonna glimpse at the sun  
like a shot from a gun  
and I'm waiting for the morning light

Whatever I see  
whatever I choose  
I know she will be standing next to me  
oh she will be standing there

Someone put the light on  
it's all we can see  
what we've done  
put the light on  
(x 2)

Hold on my dear sooner or later  
everything will come to rest  
if they take my light  
in the dare of the night  
then you can have my last breath

Whatever I see  
whatever I choose  
I know she will be standing next to me  
oh she will be standing there

Someone put the light on  
it's all we can see  
what we've done  
put the light on  
(x 2)

We are oh oh standing on the edge
