

## Better Than This

Marion Raven

So now it's time to carry on  
We're no longer stereo  
Oh we lost the fire from september  
And I can't do with only ember

And now's the day to let it be  
Cause you don't really care for me  
Weeks of silence you have put me through  
And I never knew where I had you

I wish I could push pause tonight  
In the middle of the applause and the light  
How we are together I'll forever miss  
Cause I know nothing gets better than this

But now its time to look ahead  
Forget the things we never said  
Wish I could go back and do it again  
Maybe we would do it differently then

I wish I could push pause tonight  
In the middle of the applause and the light  
How we are together I'll forever miss  
Cause I know nothing gets better than this

Oh how I wish time could stand still tonight  
In front of me you are such a sight  
How we are together I'll forever miss  
Cause I know nothing gets better than this
