

We're Heading Off Course

Marion Raven

We can follow the sun
We can follow the sun
Watch it fade away until we're gone
Watch it fade away until we're gone

Oh, it truly felt like heaven
It's falling down on me when you walked into the room that day
Since we've been drifting away
I will count to seven
It's the only the first one that really got a hold of me
We're lost out to the open sea

We're heading off course
And we're far away from home
We're heading off course
And we're sailing into the forgotten shores
We're heading off course
We're heading off course
Don't know what I'm fighting for
Cause I can't force us tonight anymore

Follow the horizon
Out here in the dark it's the only place that we are free
And even though I know it's hurting me
I do keep coming back for more
Can you remember
To have ever felt like this before
Hey now

We're heading off course
And we're far away from home
We're heading off course
And we're sailing into the forgotten shores
We're heading off course
We're heading off course
Don't know what I'm fighting for
Cause I can't force us tonight anymore

We can follow the sun
We can follow the sun
Watch it fade away until we're gone
Watch it fade away until we're gone

Hey now

We're heading off course
And we're far away from home
We're heading off course
And we're sailing into the forgotten shores
We're heading off course
We're heading off course
Don't know what I'm fighting for
Cause I can't force us tonight anymore

We're heading off course
And we're far away from home
We're heading off course

And we're sailing into the forgotten shores
We're heading off course
We're heading off course
Don't know what I'm fighting for
Cause I can't force us tonight anymore
