

Green Light

Marit Bergman

What am I gonna do?
I just wanna love you a long time baby
What am I gonna do?
This fever's burning hot and it just won't fade
Oh I know that sometimes my head's not right and
I'm no good for you
But I think that I can do better I think I can be
someone new

Now do you see the green light?
It runs all the way uptown to downtown
There's not a bump in the road there's not a shadow of
a doubt
Now do you read the headlines?
They say that I'm yours forever and you're mine
And I've got a feeling nothing's ever gonna stop us now

What am I gonna do?
I just wanna hold you for a lifetime
What am I gonna do?
You turned my head around and this way it'll stay

It is time to wipe the blackboard now and write a new
truth
In capital letters
I just wanna be with you

Now do you see the green light?
It runs all the way uptown to downtown
And the people that we drive by smile as if to say
That this must be a good sign
And that something real great will arrive
Oh I'm thinking this time it seems like love has come
to stay
Oh oh oh oh
All the times I did you wrong
All the times I let you down
I swear I'll make it up to you somehow
