

For Better for Worse

Marsha Ambrosius

His or hers
There's his side
There's her side
This is my side, right?

Speak your mind
Don't assume that I can read your mind
We both say that we would leave behind
What's in the best to give us peace of mind
Well here's a piece of mind

I hate the way you leave
The toilet seat up you so sour
Used to being solo all alone
So I can't help it
Go 0 to 100 when you want it
And I can't take it
Go 0 to a million in your feelings
And you drive me crazy

But I'm crazy for you baby, baby
For better, for worse
Even when you get on my nerves baby
For better, for worse
All the love you deserve
Don't get no better no worse
And it better be worth it baby
For better, for worse

Oh, for better, for worse
Even when you get on my nerves baby
For better, for worse
All the love you deserve
Don't get no better no worse
And it better be worth it baby
For better, for worse

From the heart
Always know that you have got my heart
And I can take it back
When times get hard
I'll never let us ever fall apart
But here's the part

I get so irritated
When you play with my emotions
I've never had to wait on anybody
I'm too focused
Go 0 to 100 when you want it
And I can't take it
Go 0 to a million in your feelings
And you drive me crazy

But I'm crazy for you baby, baby
For better, for worse
Even when you get on my last nerve baby
For better, for worse

All the love you deserve
Don't get no better nor worse
And it better be worth it baby
For better, for worse

Oh, for better, for worse
Even when you get on my nerves baby
For better, for worse
All the love you deserve
Don't get no better no worse
And it better be worth it baby
For better, for worse

For better, for worse, for better
For better, for worse
For better, for worse, for better
For better, for worse
For better, no worse, no better
Don't get no better no worse
For better, for worse, for better
And it better be worth it
For better, for worse

For better, for worse
Even when I was sleeping on your couch
You were still talking queezy out your mouth
Saying time it was getting better
Still don't wanted us to be forever
What I had to do for us to be together
So many sacrifices, I sacrificed this
Didn't have to think twice
Bout the future of who and I is
You're my good morning and goodbye kiss
Worth the drama, you're my one and only over everything
Love you over everything, love you over everything
